

VerseGRIP

**SPRAYABLE PREMIUM NON-SLIP
SEALANT**

Product Overview

VerseGRIP is a highly versatile sealant that provides both traction and cushioning to what would otherwise be hard and/or slippery surfaces. VerseGRIP is a powerful sealant that is designed to conform to and coat hard surfaces such as concrete, steel or timber, and most other surfaces. Once applied, VerseGrip cures to a completely waterproof, durable and highly flexible and compressible membrane strong enough to last for years in the harshest climate and traffic load.

VerseGRIP is used for even coverage over large areas. It is progressively applied using a hand-held spray gun to a range of thicknesses as needed over larger areas, or brushed onto small to medium sized areas.

VerseGRIP is also designed for use in projects where the coating comes directly in contact with livestock or equines as it assists in protecting such animals from slips, trips and falls that could result in injury or death.

Quick Facts

- Spray on application provides the shortest and most efficient application time
- Fast curing - trafficable in 48 hours
- Easy to clean, promoting a hygienic environment
- Excellent resistance to temperature variations
- Resistant to ultraviolet light
- Can stretch 850% and completely recover using its memory technology
