2023

CLIENT:

Maleny Army Barracks

LOCATION:

Maleny, Queensland

PRODUCT COVERAGE:

Approx. 150sqm

APPROVED INSTALLER:

Eight Six Seal

PRODUCT USED:

VersEseal Rapid Build &
VersEseal Top Coat

Nestled in the picturesque locale of Maleny, Queensland, this historical site has been revitalised with the assistance of VersEseal's advanced waterproofing solutions.

The team at Eight Six Seal collaborated with VersEseal to provide an impervious and durable waterproofing solution for the 150sqm roof of the 1820 Army Barracks safeguarding the structural integrity of the barracks for years to come.

VersEseal Rapid Build, Class 3 Membrane was used to provide a robust roof seal, ensuring it remains waterproof for years to come. The project was finished with VersEseal Top Coat in a clean white to reflect sunlight and reduce heat absorption, thereby creating a more thermally balanced environment within the barracks.

The resounding success of this undertaking can be attributed to VersEseal's defining features:

- Dependable Adhesion: For a resilient membrane system.
- Comprehensive Leak Protection: Ensuring every roof is meticulously sealed.
- Efficient Application: Minimal disruption and less risk than a full roof replacement.
- Flexible Durability: To accommodate structural movement and temperature changes
- Certified to AS/NZS 4020:2018 for Potable Water: Making it suitable for roofs where drinking water is collected.
- Certified to AS 4654.1 Class 3 External Above Ground UV Exposed Membrane: Making it perfect for roof applications where UV resistance is critical.

Embraced by the serene Maleny landscape, the 1820 Army Barracks now stands as a testament to VersEseal's proficiency, fortified against the elements, and prepared to serve for generations. Just as Eight Six Seal and VersEseal came together to achieve this accomplishment, we eagerly look forward to the opportunity to collaborate with you, offering superior waterproofing solutions for your upcoming ventures.
